EXPERIENCE

Freelance — Front-end Developer

OCT 2021 - FEB 2023

- Developed, maintained, and shipped production code for client websites primarily using Styled-components, React.js, Tailwind, and JavaScript.
- Collaborated with designers and other developers to ensure thoughtful and consistent user experiences on web applications.
- Translated design mockups into functional code, optimizing user interfaces for enhanced user experience and performance.
- Deployed web applications to the client's desired hosting provider and ensured flawless running of the websites.
- Actively participated in peer programming sessions, fostering a collaborative environment and driving continuous improvement in coding practices.

Brance Technologies — Software Developer Intern

JUNE 2022 - SEPT 2022

- Delivered all projects within established deadlines, showcasing effective project management.
- Assisted in analyzing user requirements and translating them into technical specifications, contributing to the successful delivery of projects on time.
- Reviewed and redesigned websites using tailwind and javascript enhancing user experience.
- Implemented responsive design principles to optimize website performance on mobile devices.
